Emmental Flax

Info and product catalogue

SWISS  
FLAX

## Function and vision

SwissFlax GmbH is the link between Emmental farmers and the linen market. In this function, SwissFlax buys the flax straw from the farmers, organizes the further processing from scutching the fibres to spinning into high-quality yarn. If required, we also organize the twisting and dyeing of the yarns. Our main task is the marketing of our products.

"SWISSFLAX GMBH HAS SET ITSELF THE GOAL OF REBUILDING THE VALUE CHAIN FOR SWISS FLAX AND OPERATING IT ON AN INDUSTRIAL SCALE."

## Target market

Our target market are customers who value sustainable and regional products and for whom an overview of the value chain is important. Because we grow flax in Switzerland, our prices are higher than the world market prices, which is why we tend to be in the upper price segment. On the one hand, our customers are weavers and knitters who use our yarn for their own products. On the other hand, our yarns are of great interest to suppliers of textiles (fashionable ladies' and men's clothing, table linen, bed linen, curtains, technical textiles, etc.).

## Linen yarn

We keep a stock of yarns, the size of which allows us to supply larger quantities from stock at any time. On request, we can also have customised yarns spun (delivery times on request).

Current yarn counts available from stock:

- Nm 26 bleached
- Nm 24 bleached
- Nm 20 bleached
- Nm 15 bleached
- Nm 9.6 bleached
- Nm 9.5 raw
- Nm 6 raw
- NM 3.5 raw
